

# TMR d60

New desktop, digital mailing system for small office mailing needs

- Mailmark-ready for extra savings
- Convenient postage-adding key
- Easy-to-read LCD status display
- Integrated scale for correct postage
- Inkjet printer for promotional copy
- Project professional company image
- Accounting for up to 10 departments

#### Network Connected

Part of our small office series, the TMR d60 digital mailing machine with built-in scale is ideal for the small- and medium-sized mailroom, processing as many as 18 letters per minute, up to 8mm thick. It is fully Mailmark compliant when connected via a network or WiFi to facilitate automated updates and data uploads from Royal Mail. This facility affords significant cost savings and discounts compared to regular franked mail and enables the printing of prepaid reply envelopes. The d60 also enhances mail presentations with promotional messages, its onboard ink-jet printer producing clean, crisp graphics.

#### Whisper-Quiet

The compact, whisper-quiet, semi-automatic d60 mailing system

incorporates a control panel for entering information, an onboard scale for weighing larger mailing pieces and a mail deck for queuing envelopes, postcards or label sheets ready for processing. Valuable postage funds remain secure, protected by PIN code, and accounting is provided for up to 10 internal departments, tracking postage class and spend. Keyboard-selected envelope messaging and automatic date advance are amongst other features that make this a flexible, productive, modern mailing system.

Don't make do with obsolete technology, go online with the d60 digital franking machine

Authorised independent inspector and maintainer of franking machines

Confirm specific machine details with your sales contact.

## Mailmark Franking

Mailmark technology applies an intelligent 2D barcode that helps track mailed items with extreme precision. Royal Mail guarantees that items sorted using Mailmark will always benefit from the cheapest tariff available. The system also provides immediate price updates, faster franking and routine tracking reports, superseding SMART enabled franking machines.

## Processing Speed

To help customers compare efficiency, Letter Processing speeds provide the number of standardised letters a machine is able to frank in one minute, with a reduced number for WOW-enabled machines when running mixed mail. This rating is useful to know when scheduling mailing strategies and volume requirements.

## Envelope Messaging

To make the most of franked mail, you can turn every sent item into a powerful promotion, with your company logo and/or marketing message printed alongside the postage. With various pre-loaded options and bespoke settings, you can change the message by department, priority, season or offer, providing a professional finish without the need for printed stationery.

## Postage Reporting

By linking the machine's postage meter directly to your secure online account, Inview Analytics provides easy-to-use access to every element of your postal expenditure. There are numerous standard reports to help manage your mail, or you can customise the system to your reporting requirements. This functionality is completely scalable for all business sizes and sites, providing world-class management and control, to help you save more.

## Online Connectivity

The system's web-enabled architecture provides online access to the internet, facilitating the downloading of updated software, the replenishment of postage values, access to Royal Mail services, tracking of packages and more, all via the colour touch-screen display. This facility also allows high-speed transfer of data to and from the system.
