

TMR n6000

Ergonomically engineered for maximum productivity and output

Advanced modular design offers bespoke configuration

1 Weighing platforms

- Weigh oversized mail pieces, media, and parcels
- 3,5;10 or 30 kg capacity available

2 Mixed mail feeder

- Eliminate hand sorting by size or weight
- Processes common envelopes (nested and non-nested) and postcards with ease

3 Full Keyboard

- The added comfort of a full keyboard makes set up and mail processing a breeze

4 15" colour touch screen

- Adjustable screen position provides maximum comfort for all operators
- Large descriptive prompts and buttons make navigation simple

5 Ergonomic workstation (option)

- Designed especially for the TMR n6000, this ergonomic workstation creates a comfortable workspace
- Adjustable shelving is great for holding supplies
- Dual locking doors provide additional storage and security

6 Dynamic scale (option)

- Automatically categorises mail based on shape and weight
- Accurately rates mail at speeds up to 140 letters per minute
- Royal Mail 'Price in Proportion' compliant

7 Power Conveyor Stacker (option)

- Provides consistent feeding and stacking capacity
- Decreases work-steps to achieve maximum throughput

Right choice in high volume solutions

Quadrat observed high volume mailing machine operators and listened to high volume mail customers to design the next generation mailing system. The TMR n6000 delivers simple ergonomic operations; investment protection and cost savings; reliable production and maximum uptime.

Flexible modular design

The advanced modular design allows you to configure a system where you only purchase the components, apps, and options that you need, eliminating overspending.

Maximum return on investment

New ink and printing technology provides maximum return on your investment. Say good-bye to the additional consumable cost of print heads. Each TMR n6000 comes standard with a permanent print head designed to last the life of the mailing system.

The modular and flexible design allows operator's to place components within an arm's reach

Simple, ergonomic operations

The TMR n6000 is designed with the operator in mind. At a first glance, you will notice all mailing operations are controlled from the same area, creating the ideal ergonomic workspace. The modular and flexible design of this system allows operators to adjust and place components within an arm's reach, minimising the range of motion, providing optimal work-flow and comfort.

- The height adjustable 15" touch screen moves backwards and forwards, swivels left and right, and moves up and down, providing a comfortable working environment for all of the operators using this system.
- All screens display large descriptive buttons and prompts, making navigation a breeze. Cool shades of blue minimise eye strain and fatigue. Operators can create rate shortcuts, rate favourites, and customised menu keys, all on the home screen.
- The added comfort of a full keyboard will help improve usage of account and departmental set ups.

Take control of your postage expenses

With flexible reporting at your fingertips, monitoring and controlling postage expenses has never been easier.

- Save time and eliminate errors often seen with manual postage reconciliation
- Create spreadsheets and colourful graphs
- Track mail expenses and recoup costs

Improve the Impact of your mailpiece

- Add your logo, strapline, messages or slogans
- Choose from free of charge library images

Choose from the slogan library

Support Green

Please remember the environment when you go to print. TMR print using vegetable based inks on FSC Certified paper.
